

Lab 0

Due: 28 Feb 2005

Statistics for Laboratory Scientists

This isn't really a computer lab, but it will be graded as if it were.

Write a one page summary regarding:

- a) An application of statistics in your own research, *or*
- b) An application of statistics in a journal article in your area of research.

In this summary, include a description of the following:

- a) The scientific problem
- b) The data
- c) How statistical methods might be used to address the scientific problem
